

Skunk Odor Remedy

Our canine friends will occasionally get sprayed by a skunk! The home recipe below will help to battle the offending odor but unfortunately will not eradicate it.

Step 1: Bathe with Dawn Dish soap first.

Step 2: Mix the following ingredients in an open container.

- ✿ 1 quart (or 32 ounces) Hydrogen Peroxide
- ✿ ¼ cup Baking Soda
- ✿ 1 tsp. Dawn dish soap
- ~ Use mixture within 1 hour of mixing
- ~ You may need to “double” the recipe above for larger dogs

Step 3: Use the mixture over the entire dog, focusing on the areas that were directly sprayed

Step 4: Let soak for 10 minutes – or as long as possible!

Step 5: Rinse the dog thoroughly.

Step 6: Repeat daily as needed until odor is gone.

Important Bits of Information:

- ✿ If your pet was sprayed in the face / eyes – flush eyes thoroughly with plain saline solution.
 - ~ If eye irritation persists after flushing several times, call to schedule an appointment.
- ✿ Do NOT get the above mixture in the eyes.
- ✿ Above mixture may lighten dark colored clothing.
- ✿ You will likely need to bathe the pet multiple times.
- ✿ Skunk spray is an oily liquid and will not wash out with regular shampoo.
